

ECOHAB CRUISE PHOTO GALLERY

BLOOMS

Blooms are visible from the surface of the water.

View from back of ship, showing discolored water due to a *Karenia* bloom offshore

Karenia bloom with a frontal feature where *Trichodesmium* has collected

Surface aggregations of *Karenia* midday in a bloom

Surface aggregations of *Karenia* showing patches of water with different cell concentrations

High-cell-concentration surface patch of *Karenia* within a bloom

High concentrations of *Karenia* cells aggregating at the surface (bright green) within a bloom

Dead fish floating within a *Karenia* bloom

Surface aggregation of *Trichodesmium* (gray) overlying a *Karenia* bloom (green)

Surface streaks of offshore population of *Trichodesmium*

Unless otherwise noted, all images are credited to the Florida Fish and Wildlife Conservation Commission and ECOHAB: *Karenia* project affiliates.
