

Taxa	Species	Current Status	Staff Listing Recommendation	Comments
FISH	Atlantic Sturgeon	SSC	List as Threatened	
FISH	blackmouth shiner	T	List as Threatened	
FISH	bluenose shiner	SSC	List as Threatened	
FISH	crystal darter	T	List as Threatened	
FISH	harlequin darter	SSC	Remain SSC	Need more data to better determine status of this species
FISH	key silverside	T	List as Threatened	
FISH	Lake Eustis pupfish	SSC	remove from the list	
FISH	rivulus (mangrove	SSC	remove from the list	
FISH	saltmarsh topminnow	SSC	List as Threatened	
FISH	Southern tessellated darter (tessellated johnny darter)	SSC	List as Threatened	
INVERTS	black creek crayfish	SSC	List as Threatened	
INVERTS	Florida tree snail	SSC	remove from the list	
INVERTS	pillar coral	T	List as Threatened	
INVERTS	Santa Fe cave crayfish	SSC	List as Threatened	
AMPHIBIANS	Florida bog frog	SSC	List as Threatened	
AMPHIBIANS	Georgia blind salamander	SSC	List as Threatened	
AMPHIBIANS	gopher frog	SSC	remove from the list	
AMPHIBIANS	pine barrens treefrog	SSC	remove from the list	
REPTILES	alligator snapping turtle	SSC	remove from the list	staff further reviewed definition and concluded species is not severely fragmented and therefore doesn't meet listing criteria
REPTILES	Barbour's map turtle	SSC	List as Threatened	
REPTILES	Florida brown snake (Lower Keys population)	T	List as Threatened	Lowers Keys brown snake is an isolated population
REPTILES	Florida Key mole skink	SSC	List as Threatened	
REPTILES	Florida pine snake	SSC	List as Threatened	Six of 7 external experts consulted thought species met listing criterion A3 -- projected population decline of 30%
REPTILES	Florida ribbon snake (Lower Keys population)	T	remove from the list	No strong evidence of isolated population
REPTILES	key ringneck snake	T	List as Threatened	
REPTILES	red rat snake (Lower Keys population)	SSC	remove from the list	Does not meet criteria and Lower Keys population is not an isolated population

Taxa	Species	Current Status	Staff Listing Recommendation	Comments
REPTILES	rim rock crowned snake	T	List as Threatened	
REPTILES	short-tailed snake	T	List as Threatened	FWC staff recommends that the short-tailed snake remain listed as a Threatened species because it is a Florida endemic with a restricted geographic range, 57% of its potential habitat is privately owned, it inhabits upland habitats in great demand for development, and information is lacking on its life history, habitat requirements, and population size and trends.
REPTILES	striped mud turtle (Lower Keys population)	T	remove from the list	
REPTILES	Suwannee cooter	SSC	remove from the list	
BIRDS	American oystercatcher	SSC	List as Threatened	
BIRDS	black skimmer	SSC	List as Threatened	
BIRDS	brown pelican	SSC	remove from the list	
BIRDS	burrowing owl	SSC	List as Threatened	
BIRDS	Florida sandhill crane	T	List as Threatened	
BIRDS	least tern	T	List as Threatened	
BIRDS	limpkin	SSC	remove from the list	
BIRDS	little blue heron	SSC	List as Threatened	
BIRDS	Marian's marsh wren	SSC	List as Threatened	
BIRDS	osprey (Florida's Southern coastal population)	SSC	Remain SSC	Need data to verify Southern Coastal osprey population is distinct and warrants listing as sub-population
BIRDS	reddish egret	SSC	List as Threatened	
BIRDS	roseate spoonbill	SSC	List as Threatened	
BIRDS	Scott's seaside sparrow	SSC	List as Threatened	
BIRDS	snowy egret	SSC	remove from the list	
BIRDS	snowy plover (Cuban snowy plover)	T	List as Threatened	
BIRDS	Southeastern American kestrel	T	List as Threatened	
BIRDS	tricolored heron	SSC	List as Threatened
